

Luis Gerardo Canales Ocampo

Financial Markets | Quantitative Analysis | Derivatives & Decision Support

Mexico City | +52 55 3990 7707 | luis.canales.oc@gmail.com | [LinkedIn](#) | [Financial Markets Portfolio](#)

PROFESSIONAL SUMMARY

Quantitative professional focused on financial markets, combining 2+ years of applied analytical consulting experience with specialized training in derivatives, valuation, market risk and macro-financial analysis. Independent work spans USD/MXN decision frameworks and Mexico's derivatives market structure. Placed 4th in the MexDer Challenge 2026, a national derivatives trading competition. Across ~20 international projects, owned methodology, modeling, validation and delivery, translating complex evidence into clear, defensible outputs for multidisciplinary stakeholders.

CORE COMPETENCIES

Financial Markets | Derivatives | FX & Rates | Fixed Income | Market Risk | Financial Instrument Valuation | Macro-Financial Analysis | Scenario Analysis | Research & Validation | Decision Support | Python | Excel/VBA

SELECTED FINANCIAL MARKETS WORK & ACTIVITIES

USD/MXN Macro-Financial Decision Framework | Independent Research 2026

- Designed a macro-financial research and decision-support framework to evaluate global conditions, relative Mexico-U.S. monetary incentives and Mexico-specific information across horizons, with explicit rules for data alignment, transformations, scenarios and inference; research design complete, analysis in development.

Mexican Derivatives Market & Regulation | Independent Research 2026

- Mapped Mexico's derivatives regulatory and institutional ecosystem and developed a comparative research framework to examine how regulation, market infrastructure and participant incentives may interact with market depth, liquidity and local participation.

MexDer Challenge 2026 — 4th Place | National Derivatives Trading Competition | Grupo BMV 2026

- Managed simulated USD/MXN and S&P/BMV IPC futures across maturities in a national derivatives trading competition, monitoring instrument behavior, market conditions, and position exposures while adapting decisions under execution constraints; 1,500+ participants registered.

PROFESSIONAL EXPERIENCE

Quantitative Research Consultant | DXANDI - International Applied Research Consulting Apr 2024 - Jun 2026

- Owned quantitative methodology, modeling, validation and delivery across ~20 international applied-research engagements; approximately 10-12 projects progressed to journal submission.
- Resolved data and model inconsistencies by tracing causes, challenging assumptions and redesigning analyses when needed, maintaining reproducibility, traceability and defensible conclusions under incomplete information.
- Produced technical reports, analytical documentation and client-facing presentations, translating complex results into clear conclusions for multidisciplinary stakeholders.

ADDITIONAL PROFESSIONAL EXPERIENCE

Quantitative Modeling Lead | Carbon Oh-No! — Award-Winning Climate-Finance Innovation Project 2020 - 2022

- Designed the quantitative foundation of an award-winning climate-finance project, developing a modeling proof of concept under limited data and integrating the analytical framework with carbon-credit standards, regulation, financing, and implementation planning; won 1st place in Mexico and 2nd overall in the Ocean Hackathon international final, organized by *Campus Mondial de la Mer* in France.

EDUCATION

B.Sc. Mathematics | Faculty of Sciences, UNAM Expected May 2027

Full-time work availability; remaining coursework scheduled outside working hours. **Selected training:** derivatives pricing, fixed income, market risk, stochastic processes, portfolio optimization and XVA.

TECHNICAL SKILLS & LANGUAGES

Tools: Excel, VBA, Python, SQL, R, Power BI. **Languages:** Spanish (native); English (advanced).
