Luis Gerardo Canales Ocampo

Investment Banking Internship Candidate | Financial Analysis | Quantitative Consulting

Mexico City | 5539907707 | luis.canales.oc@gmail.com | LinkedIn | Investment Banking - Profile & Work

PROFESSIONAL SUMMARY

Quantitative consultant with 2+ years of experience delivering decision-support frameworks, practical analytical tools, validated models, and client-facing reports and presentations across ~20 international engagements. Has developed a sustained financial foundation through prior accounting studies, Mathematics coursework at UNAM, and independent projects in financial analysis and capital markets. Brings analytical ownership, rigorous quality control, and clear stakeholder communication to a long-term career in investment banking.

CORE COMPETENCIES

Financial Statement & Ratio Analysis (Coursework) | Corporate Finance Fundamentals | Capital Markets | Economic & Financial Research | Quantitative Modeling | Scenario Analysis | Methodology & Model Validation | Decision-Support Reporting | Client Presentations | Stakeholder Coordination | Excel | PowerPoint

PROFESSIONAL EXPERIENCE

Quantitative Research Consultant | DXANDI — International Applied Research Consulting **Apr 2024 – Jun 2026**

- Owned methodology, modeling, validation and delivery across ~20 international engagements, translating stakeholder needs and incomplete information into decision-support frameworks and usable analytical outputs.
- Investigated data and model inconsistencies, challenged assumptions and refined methodologies, documenting findings, limitations and validation steps to support reliable conclusions.
- Produced client-facing reports, presentations and practical analytical tools for multidisciplinary stakeholders; approximately 10–12 projects advanced to journal submission.

FINANCIAL PREPARATION & SELECTED WORK

Financial Statement & Ratio Analysis | Prior Accounting Coursework

- Analyzed financial statements and key ratios to assess profitability, liquidity, leverage and operating performance in an academic context.

USD/MXN Macro-Financial Decision Framework | Independent Research (In Development) **Jun 2026 – Present**

- Designing a decision-support framework relating Mexico–U.S. monetary conditions, global drivers and Mexico-specific factors to FX scenarios; empirical validation remains in progress.

MexDer Challenge 2026 — 4th Place | Simulated Futures Competition, Grupo BMV **May 2026**

- Managed simulated USD/MXN and S&P/BMV IPC futures positions across maturities, monitoring exposures, market conditions and execution constraints; 1,500+ participants registered.

ADDITIONAL PROJECT LEADERSHIP

Quantitative Modeling Lead | Carbon Oh-No! — Climate-Finance Innovation **2020 – 2022**

- Led quantitative modeling within a nine-person team, connecting a proof of concept to carbon-credit regulation, financing and implementation planning; 1st in Mexico and 2nd internationally at Ocean Hackathon.

EDUCATION

B.Sc. Mathematics | Faculty of Sciences, UNAM **Expected May 2027**

Full-time work availability; remaining coursework scheduled outside working hours. **Selected financial training:** financial statement and ratio analysis (prior accounting studies); corporate finance fundamentals; fixed income and derivatives valuation; portfolio optimization; market risk; probability and statistics.

TECHNICAL SKILLS & LANGUAGES

Tools: Excel (advanced), PowerPoint, Word, VBA, Python, SQL, R, Power BI. **Languages:** Spanish (native); English (advanced).
